

Erin Teagan

Sample presentations, science demonstrations, and workshops. Visit www.erinteagan.com for a full listing.

Go Behind the Scenes of Luciana!

Get to know Luciana, American Girl's Doll of the Year. See her story from behind the scenes and discover the three things that surprised me the most while writing the books. Learn more about how astronauts train and what it's like to go to Space Camp. **Hands on STEM activity included for classrooms and libraries!

Additional programs include: Microscopic Mysteries, Cool Science, Write Like a Scientist, Relying on Research, The Truth about Being and Author, and more!

Putrid Petri Dishes: (also available by Skype!)
Using the scientific method, we will run an experiment together as a group. Where is the dirtiest, most putrid, place in your classroom? Is it the floor? The teacher's desk? Your own dirty hands? We will make predictions and swab different areas of the classroom and watch bacteria and fungus grow on petri dishes.

Fees:

Schools: \$400 for half-day (2, 1hr presentations)

\$750 for full-day (3-4, 1hr presentations)

Skype: 20 min Q&A FREE!

Science skype: \$200

Libraries: \$200 (1hr interactive presentation)

Erin Teagan is the author of the Luciana series (American Girl, Girl of the Year 2018) and The Friendship Experiment. Erin worked in science for more than ten years before becoming a writer and she uses many of her experiences from the lab in her books. She loves sharing the best and most interesting (and most dangerous and disgusting) parts of science with kids. Erin lives in Virginia with her family, a puppy named Beaker, and a bunny that thinks he's a cat. www.erinteagan.com
